

OCT 1 1971

SYVA Research Institute

September 30, 1971

Dr. Joshua Lederberg
Department of Genetics
Stanford University Medical School
Stanford, CA 94305

Dear Dr. Lederberg:

In connection with the Symposium on Drug Abuse to be held at Stanford University on October 18-19, it occurred to me that some of the participants might be interested in seeing a demonstration of FRATtm, the opiate detection system that is presently being used in Vietnam. This demonstration is planned for about 5:00 P.M., Tuesday, October 19, or as soon as it is possible to convene at Syva following the final talk. Syva is located less than ten minutes by car from Stanford in the Stanford Industrial Park

I would appreciate it if you would indicate on the enclosed card if you plan to attend and whether transportation will be required.

Sincerely,

Edwin F. Ullman
Director of Research
